<u>MOKI DANIEL DETAILED LEARNING STATEMENT</u>

LONG TERM GOAL

By April 2021, complete all the nine projects in the front-end developer course provided by open Classrooms International in order to develop and deploy my own website in the Amazon Web Services cloud platform which will in long run turn to be my business.

LEARNING RYTHM

I am planning to give this course twelve hours a week, so that I balance between it with the cloud Devops engineer course I am undertaking as well.

HOW I WILL HANDLE FRUSTRATIONS

I am very much aware that this course will not be a walk in the park, due to this, I will use previously utilized measures to overcome the frustrations, this will include but not limited to;

1) Use workspace platform to request for assistance from other students and mentors when I am stuck during my study period.
2) Do feedback requests to my mentor frequently to ensure I am on track during the entire study period.
3) Do blogs and videos of previously studied subjects and share in several groups for feedback to master the acquired knowledge.
4) Keep applying for Jobs without relenting till I get one in the software engineering field.

MY FIVE SMART LEARNING GOALS

1) I aspire to master "learn how to learn" subject in the open-classrooms international curriculum at the level of a professional learner, do the required project by 11th April 2020 and achieve a pass after submission to the school for review.
2) Be able to integrate a word-press theme for a client at the level of a word-press expert, and achieve a pass by submitting a project entailing the same to the open-classrooms International school for review by 22nd May 2020.
3) I aspire to be able to analyze client needs for a project to a level of an expert by undertaking the following three subjects at open Classrooms International. "Manage your code projects", "Create a responsive websites efficiently with Bootstrap 4", "Breakdown and Integrate a mock-up" and finally submit a project for review before 2nd July 2020.
4) I aspire to be able to map out a technical solution for a website, using MySQL database to a level of a Database expert, this will be achieved by studying the subjects attached to this project in the open classrooms website between 2nd July 2020 and 20th August 2020 and submit the project to the school for review before the set timeline which is 20th August 2020.
5) I aspire to learn JavaScript and create a quotation generator similar to google quote generator at a JavaScript expert level between 20th August 2020 and 8th October 2020 and submit a project to open classrooms for review before the set timeline that is 8th October 2020.
